

Yolanda Jian

(289)-934-1612 | y3jian@uwaterloo.ca | [/in/yolandajian](https://in.yolandajian.com) | github.com/y3jian | yolandajian.com

TECHNICAL SKILLS

Languages & Scripting: Python, Java, SQL, R, JavaScript, HTML/CSS, VBA

Frameworks/Libraries/Databases: Pandas, NumPy, scikit-learn, Matplotlib, PostgreSQL, MySQL, Node.js, React

Platforms/Tools: Tableau, Power BI, AWS, Azure, Azure DevOps, Git, Alteryx, Power Automate, Power Apps

WORK EXPERIENCE

Canadian Imperial Bank of Commerce (CIBC)

Toronto, ON

Software Project Coordinator Intern

Sept 2025 – Dec 2025

- Owned project financial and delivery data for **38 software projects**, using SQL- and Excel-based workflows to model budgets, forecasts, and variances, and enable data-informed leadership decisions.
- Integrated Python-based data pipelines** to ingest, clean, and transform project and financial data from **Jira, Confluence, and Excel**, feeding Power BI dashboards used for weekly executive reporting across **50+ projects**.
- Standardized and automated reporting workflows across **31 software initiatives**, improving data reliability and consistency while reducing manual reporting effort by 30%.

Data Engineer Intern

Jan 2025 – Apr 2025

- Developed a real-time **Tableau** dashboard with automated **ETL** workflows from **Azure DevOps** to track productivity metrics, reducing reporting lag by 60+ minutes per day.
- Built 5 end-to-end **automation pipelines** to streamline data processing and reporting tasks using **Python**, Alteryx, and Excel-based scripting to cut manual operations by **300+** hours.
- Managed **SQL** databases to support **CI/CD** pipelines and monitored automated workflows to improve troubleshooting.
- Led the development of **dynamic web interfaces** for a record-keeping system using Power Apps, Alteryx, and Power Automate, enabling data access to **1,000+** digital records daily.

Canada Revenue Agency

Toronto, ON

Data Analyst Intern

May 2024 – August 2024

- Wrote **SQL** queries using **SAS** and **Aginity** to process and analyze demographic data from **30M+** taxpayers, optimizing demographic clustering and increasing digital transformation conversion by 21%.
- Built dashboards in **Power BI** and **Excel** to analyze client-platform engagement, driving the development of a nationwide digital transition plan and reducing paper usage by 9%.
- Piloted a solution for **AI-powered biometric authentication**, using predictive analytics to improve client data security by **30%**.

PROJECTS

Scan2Craft 3D Scan Data Pipeline | Python, NumPy, Trimesh, scikit-image, litemapy

- Built an end-to-end **data pipeline** in Python to convert 3D mesh files into structured **.litematic** outputs for Minecraft, processing 50k+ voxels per asset.
- Optimized voxelization and colour-mapping logic using **NumPy vectorization** and CIE-LAB distance, reducing processing time by ~40% while preserving colour accuracy across block palettes.

LLM-Powered Financial Q&A Chatbot | Python, LangChain, HuggingFace Transformers, Streamlit

- Developed a full-stack AI-powered question-answering system in **Python** that uses **LangChain** and **HuggingFace models** to deliver investment insights from scraped financial knowledge bases, achieving a **92%** answer relevance in testing.
- Integrated FAISS vector search for document retrieval and **Streamlit** for interactive UI, demonstrating practical LLM deployment and embedding pipelines.

Café Flo App | React Native, TypeScript, Node.js, Gemini API, Figma

- Designed and implemented backend data flows and transformation logic using **Node.js, SQL, and Snowflake** to convert raw user interaction and cycle-phase data into structured, queryable datasets supporting personalized recommendations and analytics.
- Integrated and operationalized an **LLM-powered assistant (Gemini API)** within the data pipeline, tuning inference parameters and ensuring data quality and reliability so AI-driven insights could be safely surfaced to users at scale.

EDUCATION

University of Waterloo, BAsc. in Management Engineering + AI, CGPA: 3.8 / 4.0

Sept 2023 – Apr 2028

- Relevant Courses: Databases and Software Design, Data Structures and Algorithms, Probability and Statistics II, Optimization, Linear Algebra, Microeconomics
- 2023 President's Scholarship for exceptional academic performance.
