(289)-934-1612 | [y3jian@uwaterloo.ca](mailto:y3jian@uwaterloo.ca) | [/in/yolandajian](https://in.yolandajian.com) | [github.com/y3jian](https://github.com/y3jian) | [yolandajian.com](https://yolandajian.com)

## TECHNICAL SKILLS

**Languages & Scripting:** Python, Java, SQL, R, JavaScript, HTML/CSS, VBA

**Frameworks/Libraries/Databases:** Pandas, NumPy, scikit-learn, Matplotlib, PostgreSQL, MySQL, Node.js, React

**Platforms/Tools:** Tableau, Power BI, AWS, Azure, Azure DevOps, Git, Alteryx, Power Automate, Power Apps

## WORK EXPERIENCE

**Canadian Imperial Bank of Commerce (CIBC)**

**Toronto, ON**

*Automation Developer Intern*

*Jan 2025 – Apr 2025*

- Developed a real-time **Tableau** dashboard with automated **ETL** workflows from **Azure DevOps** to track productivity metrics, reducing reporting lag by **60+** minutes per day.
- Built **5** end-to-end automation pipelines to streamline data processing and reporting tasks using **Python**, Alteryx, and Excel-based scripting to cut manual ops by **300+** hours.
- Managed **SQL** databases to support **CI/CD** pipelines and monitored automated workflows to improve troubleshooting.
- Led the development of dynamic web interfaces for a record keeping system using Power Apps, **Alteryx**, and Power Automate, enabling data access to **1000+** digital records daily.

**Canada Revenue Agency (CRA)**

**Toronto, ON**

*Research Data Analyst Intern*

*May 2024 – August 2024*

- Wrote **SQL** queries using **SAS** and **Aginity** to process and analyze demographic data from **30M+** taxpayers, optimizing demographic clustering and increasing digital transformation conversion by **21%**.
- Built dashboards in **Power BI** and **Excel** to analyze client-platform engagement, driving the development of a nationwide digital transition plan and reducing paper usage by **9%**.
- Developed a pilot solution for **AI**-powered biometric authentication, integrating predictive analytics to improve client data security by **30%**.

**Waterloo Data Science Club**

**Waterloo, ON**

*Project Coordinator*

*Sept 2024 – Apr 2025*

- Coordinated logistics and timelines for Canada's largest student-run data hackathon (**300+** participants, **10+** sponsors), ensuring smooth event execution.
- Designed interactive dashboards in **Excel** and **Figma** to track event planning process and stakeholder deliverables.
- Led **ML/AI** workshops, boosting participant engagement by **78%** through hands-on technical content and active feedback loops.

**Service Parfait**

**Toronto, ON**

*Software Developer Intern*

*Jun 2023 – August 2023*

- Developed user-friendly **Java** tools to automate financial calculations, reducing daily processing time by **1** hour.
- Digitized invoice workflows using **VBA** integrated with Simply Accounting, saving over **\$1000** annually in paper costs.
- Resolved **50+** client-reported issues, enhancing software stability, customer experience, and client retention.

## PROJECTS

**LLM-Powered Financial Q&A ChatBot** | Python, LangChain, HuggingFace Transformers, Streamlit

- Developed a full-stack AI-powered question-answering system in **Python** that uses **LangChain** and **HuggingFace models** to deliver investment insights from scraped financial knowledge bases, achieving a **92%** answer relevance in testing.
- Integrated FAISS vector search for document retrieval and **Streamlit** for interactive UI, demonstrating practical LLM deployment and embedding pipelines.

**Smart Bin App - 2nd Place, Women in Engineering Sustainability Hackathon** | JavaScript, HTML/CSS, C++, Arduino

- Built a web app using **JavaScript**, **HTML**, and **CSS** to gamify waste tracking in dorms, targeting **90%** waste diversion by 2035.
- Implemented user authentication and point-tracking logic to support dorm-level leaderboards and engagement analytics for **7000** students across **8** housing units.
- Connected the app to an **Arduino**-based sensor using serial input to log disposal events and update point systems in real time.

## EDUCATION

**University of Waterloo, BAsc. in Management Engineering**, CGPA: 3.8 / 4.0

*Sept 2023 – Apr 2028*

- Relevant Courses: Databases and Software Design, Data Structures and Algorithms, Probability and Statistics II, Optimization, Linear Algebra, Microeconomics
- 2023 President's Scholarship for exceptional academic performance.
